

Do you need
Avalon?

Avalon: Features and Benefits Overview

Your business success depends on your IT infrastructure. Consider letting Nonik Technologies deliver proactive services that keep your network up and running effectively and efficiently.

By implementing **Nonik Technologies's** Avalon system, you will see increased performance, security, and reliability – immediately, and at an affordable price.

FEATURES

1. Quick Response

- Nonik Technologies can monitor what issues are affecting your network, and will respond before they become critical
- Automatic alert dispatches guarantee a quick response

2. Security Monitoring

- Avalon Alerts Nonik on attempted network access by unauthorized users
- Software content control allows you to ban high-bandwidth interactive games or illegal peer-to-peer file sharing which monopolize business resources and promote viruses and Spyware
- Extensive security reporting gives you a bird's-eye view of your entire network's security
- Patch inventory ensures your operating systems are up to date and not vulnerable to outside threats

3. Graphical Performance Reporting

- Scheduled executive reporting, automatically generated and sent directly to your e-mail address
- Easy-to-understand graphical reports with "un/acceptable threshold" lines
- Simplifies capacity management and upgrade planning

FEATURES

4. Remote Management and Communication

- Nonik Technologies can minimize disruptions to the work environment by remotely resolving issues using a secure VPN system
- If an issue arises that requires on-site assistance, prior in-depth knowledge allows us to send fully prepared specialists who can resolve the issue faster than ever before
- Network services monitoring and alerting (POP3, HTTP, FTP and others)
- Very low bandwidth requirements – does not slow down your network response time

5. Detailed Site Level Inventory

Up-to-date hardware, software and patch information - automatically collected, 100% accurate – can be used for insurance claims in case of flood, fire or theft

GROW YOUR BUSINESS, CUT COSTS!

- Periodic consultations with Nonik shift from fixing problems to cooperatively managing your network's growth
- Maximize the life of existing hardware and minimize unnecessary expenses by reallocating existing resources to where they are needed most
