Do you need
Avalon?

AVALON OVERVIEW

Boost performance, tighten security, and extend the life of your IT assets

Left unmonitored, your network will inevitably fail, leaving employees idle and impacting your ability to do business—costing thousands through the loss of productivity, revenue, or image.

With Avalon from Nonik Technologies, you can take corrective action before the problem occurs, or before it's even noticed.

Today's Business Environment

Your business depends on your network's availability, performance, and security—and your software is business-critical.

The five most common frustrations:

- E-mail/Work Order delivery systems down
- Client database unavailable
- Spyware and unauthorized access issues
- Banned software (games and file-sharing) monopolizing resources
- Predictable hardware failures

Nonik Technologies's Avalon System provides an affordable solution

Key Benefits

- Significant decrease in downtime
- Improved network and hardware performance
- Fewer 'growing pains' via network capacity management
- Lower costs and increased efficiency through resource reallocation
- Protection against security breaches
- IT service visits are more productive and less intrusive
- Increased employee productivity by automating routine administrative functions

What is Avalon?

Avalon allows Nonik Technologies to continuously monitor the health of your infrastructure—and manage growth by providing:

- Scheduled site/device reporting—a bird's eye view into the real performance of your IT infrastructure
- Perspective into what equipment and software has been installed, and where current or new system resources can be best allocated
- The ability to forecast failures before they occur, such as a critical server running out of hard drive space

Our proactive approach to managing computer networks will free-up capital so you can concentrate on GROWING your business—not fixing it.

For a network that will grow with your business, contact Nonik Technologies 517.437.4294
